SOLID
COLLECTION

Solid colours

The defining feature is their consistent, solid color throughout the laminate sheet.

Whether you prefer vibrant hues or subtle shades, laminates offer endless design possibilities to elevate your space.

Need More

When using plain colored laminates, the edge of the finished product becomes very visible. So it is important to consider the edge banding material and color.

BE CAUTIOUS ON AIR BUBBLES

While pasting the laminate sheets vertically, little extra care is appreciated. If not pressed uniformly, air bubbles possibly can appear.

CUT ANGLE OF 90° ON LAMINATES CAN CAUSE CRACKS, NO CLAIMS WILL BE ENTERTAINED IF DONE SO

When cut with L shape and at 90° angle, one of the two edges might get an elongated cut. Such corners are prone to cracks. Avoid improper bonding and improper weather conditions to prevent cracking.
